1. **Status:** Receipt is acknowledged of papers submitted 04-15-2005, under amendments, which, have been placed of record in the file. Claims 1-10 are pending in this office action.

Response to Amendment

2. The Applicant's has amended independent claims 1,6. This amended with examiner amendments, overcomes prior art rejection, which puts application number 10074414 in condition for allowance.
3. Applicant has amended the abstract per objection. The amended abstract overcomes objection to abstract, therefore objection to abstract is withdrawn.

EXAMINER'S AMENDMENT

4. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a personal interview with Thomas Presson on May 26, 2005.

The application has been amended as follows:

In the drawings

On page 18/18, After "FIG. 18" add "PRIOR ART".

Art Unit: 2673

5. Claims 1-10 are allowed.

6. The following is an examiner's statement of reasons for allowance:

1. (Currently Amended) A liquid crystal projector apparatus which includes a plurality of liquid crystal panels for optically modulating light from a light source with an input signal and projects the optically modulated light from said plurality of liquid crystal panels to display an image, said liquid crystal projector apparatus comprising: a temperature sensor for indirectly detecting a temperature of each of said plurality of liquid crystal panels, a memory for storing temperature detection data obtained by said temperature sensor within a period from a power supply starting time to a steady operation entering time of said liquid crystal projector apparatus, arithmetic operation means for estimating a temperature of each of said plurality of liquid crystal panels by indirectly detecting a temperature of the temperature sensor and adding such temperature to a temperature of a time shift period of the power supply obtained from predetermined graphical relationships of starting time shift data for each of said plurality of liquid crystal panels, and a plurality of liquid crystal drive sections for correcting drive voltages for driving each of said plurality of liquid crystal panels with an output signal of said arithmetic operation means and applying the corrected drive voltages to each of said plurality of liquid crystal panels.

The cited references on 892's fails to anticipate individually as well as render obviousness individually or in combination above bold underlined recited claim.
